Virtualization is efficient and scalable. Is your business ready?

With Eagle Virtualization Assessment services, our engineers assist you in developing and deploying a complete virtualization solution to meet your specific business requirements. Our assessment applies best practices to ensure your environment is optimized to reduce and/or evade pit-falls leading to major complications. Based on our findings, we provide recommendations and available options to maximize the efficiency and reliability of your virtual server or virtual desktop infrastructure.

Eagle Virtualization Assessment Services

- Virtual networking configuration
- Storage configuration
- Virtual machine configuration
- Management configuration
- Licensing compliance

Documentation and Deliverables Provided

- Determination and documentation of best practices and guidelines for an efficient and reliable virtual environment
- If deemed necessary, Eagle will provide a solution, along with a road map for implementation
- Assistance with planning for future growth, new applications, and business challenges

An Eagle Virtualization Assessment ensures that you've identified and resolved problems in your environment, and are equipped with procedures and technology solutions for a foolproof plan. The result is an optimized virtual infrastructure that adds increased business value to your organization.
