

## Data protection... now in the cloud.

As organizations shift towards IT-as-a-service models, there is a critical need to protect data residing across physical, virtual, and now cloud environments. Eagle offers cross-platform, highly available solutions that protect your data in a variety of ways, based on your business needs. Eagle has more than 30 years of experience in protecting customer data, and our services leverage our expertise and engineering resources to provide superior cloud solutions and support.

At Eagle we work closely with our customers to understand specific organizational needs. The result is a solid data protection and disaster recovery plan. Because we take an agnostic approach to determine how to best protect your data, Eagle is uniquely positioned to build a tailored strategy, with the proper solutions to fit those needs. This personalized service is what sets us apart from other cloud solution providers. In short, we will help you determine if the cloud is right for you.

Eagle Cloud offers the following core solutions:

**Backups** Eagle offers fully managed backup solutions that leverage CommVault, the industry's leading enterprise backup product. We then utilize Eagle's expertise to provide a worry-free, fully managed and monitored appliance-based solution. This solution can also replicate data into Eagle's cloud for remote data protection and DR.

**DASH** For existing CommVault users, Eagle offers the ability to send backup copies to Eagle's cloud (known as "DASH" within **Commvault**). As a customer, you will be able to continue leveraging your investment in the industry's leading enterprise backup product, while gaining the capability to eliminate tape and/or keep a copy of your data offsite in our secure and resilient remote data center.

**Replication** For customers hosting data on their own storage array, Eagle offers the ability to replicate data into Eagle Cloud, using the block-based replication features built into your storage array. This is a very affordable and worry-free method for ensuring your data is copied offsite.

**Compliance** For customers challenged with regulatory requirements (HIPAA, CFTC 1.31, e-CFR and more), data integrity, or long-term archiving and retention policies, Eagle Cloud provides a host of services to fulfill your needs. These services provide turnkey solutions for fixed content data like document archiving, email archiving, medical/PACS archiving and the general archiving of all unstructured data.
