Eagle Cloud: Backup as a Service

Eagle's Backup as a Service is a cloud based data backup and recovery solution, without any need for onsite management, physical hardware or complicated infrastructure. Organizations find that by off-loading the complicated task of managing backups, they can focus resources to other business needs and reduce their overall IT footprint. The solution is managed through a single pain of glass and utilizes Eagle's expertise for a secure, worry-free, managed and monitored solution.

Eagle's Backup as a Service offers the following advantages:

Built in Cyber Protection: with Eagle's Backup as a Service, your data is also safe from cyber threats with a platform that monitors your data for malware, ransomware and other threats. Your backup data is encrypted and stored in an immutable data store in Eagle's secure cloud.

Managed Disaster Recovery: in the case that your organization experiences data loss, or becomes targeted by ransomware or other cyber threats, Eagle can quickly recover and secure your data to its original state with little to no impact to your business.

Customized, Fully Managed Data Backup Strategy: we tailor a solution to meet your business needs with real-time backups; whether you have a single location or several branch offices.

Offsite Data Storage: to Eagle's secure, immutable cloud environment.

Built-in support: related to the setup and maintenance are included.

Predictable and Affordable Pricing: with no hidden costs, so budgeting is easy.

For over 40 years, Eagle has partnered with customers to provide secure, resilient data protection solutions. Leverage Eagle's Backup as a Service solution, and take the worry and complexity out of your data protection requirements. You can be confident your data is in good hands with Eagle Technologies.
